

Software Design Project for CS889
Example interview questions
Michael Terry
mterry@cs.uwaterloo.ca

How would you rate your computer expertise?

Have you used software applications like system configurators before?

Which ones, specifically?

How and why do you use them?

What aspects of their designs do you like and which do you feel could be improved?

We have some new designs for this type of software. I'd like to get your feedback on them.
